Eventide Core Bond Fund

A: ETARX | C: ETCRX | I: ETIRX | N: ETNRX

Fund Objective

Seeks total return consistent with income generation

About the Fund

The fund seeks to invest at least 80% net assets in bonds.

Benchmark

Bloomberg U.S. Aggregate Bond Index

Morningstar Category

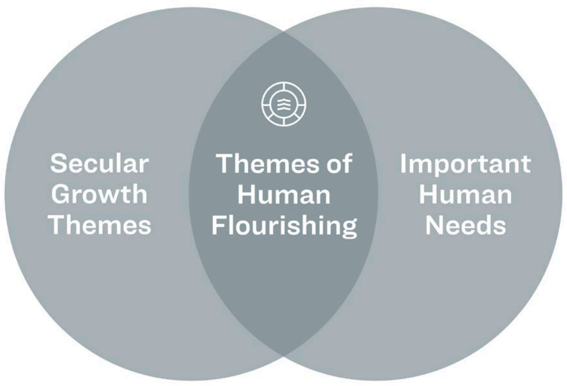
US Fund Intermediate Core Bond

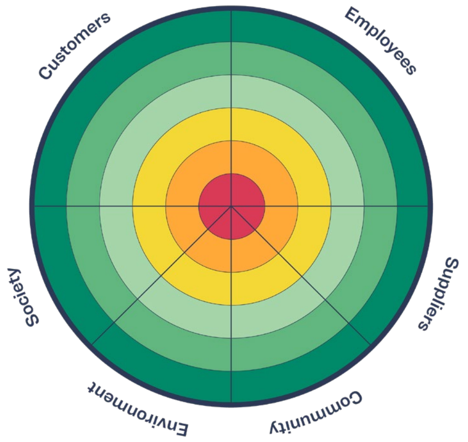
Total Net Assets

$215M

As of June 30, 2026. The Bloomberg U.S. Aggregate Bond Index is a broad based benchmark that measures the investment-grade, U.S. dollar-denominated, fixed-rate taxable bond market. This includes Treasuries, government-related and corporate securities, mortgage backed securities, asset-backed securities and collateralized mortgage-backed securities. Investors cannot directly invest in an index, and unmanaged index returns do not reflect any fees, expenses, or sales charges. The volatility of an index may be materially different than that of the Fund, and investors should not expect the Fund to achieve the same results as a listed index.

Eventide Distinctives





Themes of Human Flourishing

Seeking to invest in companies positioned to participate in long-term secular investment themes that serve important human needs.

Creating Compelling Value for Society and the Global Common Good

Focused on identifying and investing in companies capable of increasing profitability and growth by serving well the needs of customers, employees, suppliers, communities, the environment, and society.

For informational purposes only. There is no guarantee that the Adviser's approach will produce the desired results. All investments involve risks, including the possible loss of principal. We refer to long-term secular investment themes as those that tend to be persistent through market conditions.

Investment Philosophy

We believe **high-quality companies** that excel at **creating value for others** and **trade at a discount to intrinsic value** offer superior long-term risk-adjusted returns.

The Adviser's judgment about the quality and intrinsic value of companies may prove to be incorrect. There is no guarantee that any investment will achieve its objectives, generate positive gains, or avoid losses.

Investment Process

Boyd Watterson is the subadvisor for the Fund and follows an approach which:

- Combines the Eventide Business 360® framework with fixed income expertise.
- The Business 360® framework looks for green, social, and sustainable[1] businesses or government entities.
- Together the subadvisor and Eventide form an investable universe of fixed income securities.
- The subadvisor performs the credit analysis, the sourcing and the everyday bond management activities in the portfolio.
- The subadvisor applies its "alpha drivers" to fixed income management, namely sector allocation, duration management, yield curve positioning and securities selection.

The Adviser's judgment about industries, secular themes, and particular companies may prove to be incorrect. There is no guarantee that any investment will achieve its objectives, generate positive returns, or avoid losses. We refer to long-term secular investment themes as those that tend to be persistent through market conditions.

1. Green bonds allow issuers to use proceeds for environmental projects; social bonds allow issuers to use proceeds for social projects; sustainable bonds are a combination of green and social bonds

Alpha Drivers

Sector Allocation

Explaining fundamentals, historical spread and cross-sector spread relationships, and supply and demand.

Duration Management

Applying fundamental and technical analysis to manage interest rate exposures relative to short- and long-term expectations.

Yield Curve Positioning

Examining monetary policy, inflation expectations, and supply and demand relative to expectations for curve reshaping.

Security Selection

Applying a top-down, bottom-up approach that blends quantitative screening and fundamental credit research to achieve optimal risk/reward characteristics.

There is no guarantee that the Adviser's Investment Process will produce the desired results. All investments involve risks, including possible loss of capital.

Values-Based Analysis

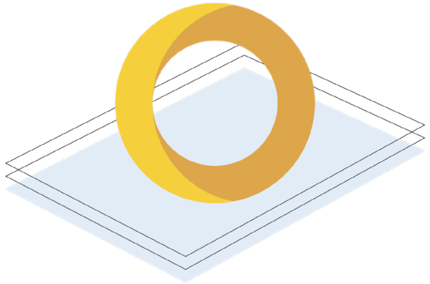
There are three dimensions to our approach to values-based investing:

AVOID

Create an investable universe of securities that pass our screens, grounded in our values.

EMBRACE

Conduct original Business 360® research to find the highest quality opportunities that contribute to human flourishing through value creation for society and other key stakeholders.



ENGAGE

Engage portfolio companies and security issuers on Business 360® issues to advocate for positive change.

The Strategy's ethical values screening criteria could cause it to underperform similar strategies that do not have such screening criteria. This could be due to ethically acceptable companies falling out of favor with investors or failing to perform as well as companies that do not meet the Strategy's ethical screening guidelines. Reference to Eventide's Business 360 approach is provided for illustrative purposes only and indicates a general framework of guiding principles that inform Eventide's overall research process. The Adviser's judgment about the quality of a particular company may prove to be incorrect. There is no guarantee that any investment will achieve its objectives, generate positive returns, or avoid losses.

Our Research Framework: Business 360®

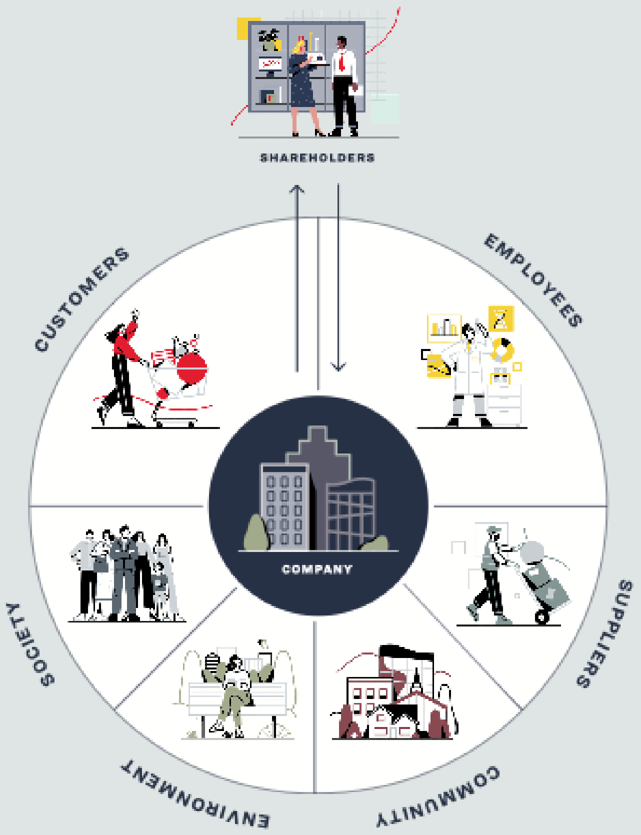
Our **proprietary framework** for evaluating both a company's **long-term competitive advantage** and its **impact on human flourishing** by analyzing its **operations and strategy** through the lens of **key stakeholders**.

Reference to Eventide's Business 360® approach is provided for illustrative purposes only and indicates a general framework of guiding principles that inform Eventide's overall research process.
The Adviser's judgment about the quality of a particular company may prove to be incorrect. There is no guarantee that any investment will achieve its objectives, generate positive returns, or avoid losses.

We believe what's right...

Companies that place a premium on:

- Customer satisfaction
- Employee morale
- Supplier partnership
- Societal impact
- Environmental stewardship



...is also smart.

Tend to have:

- Higher customer loyalty
- Higher productivity
- Resilient supply chains
- Stronger brands
- Sustainable productive yield

Reference to Eventide's Business 360® approach is provided for illustrative purposes only and indicates a general framework of guiding principles that inform Eventide's overall research process. The Adviser's judgment about the quality of a particular company may prove to be incorrect. There is no guarantee that any investment will achieve its objectives, generate positive returns, or avoid losses. The term "smart" is used for informational purposes only, and does not imply a certain level of skill of training by the Adviser.

Investment Themes

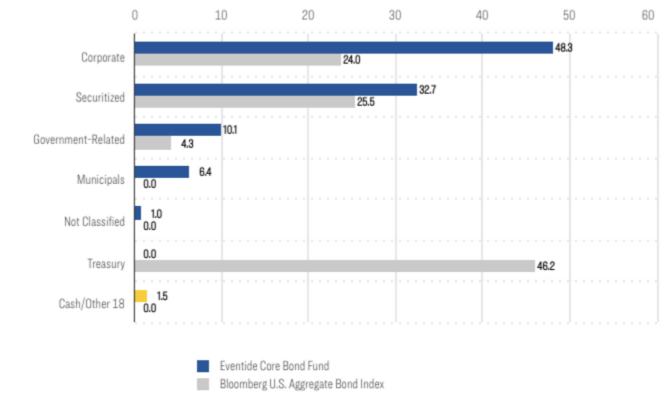
Seeking to invest in companies positioned at the nexus of long-term secular growth themes and important human needs.

These are representative examples of themes in the Eventide Strategies. The Adviser's judgment about secular themes may prove to be incorrect. There is no guarantee that any investment will achieve its objectives, generate positive returns, or avoid losses. We refer to long-term secular investment themes as those that tend to be persistent through market conditions.

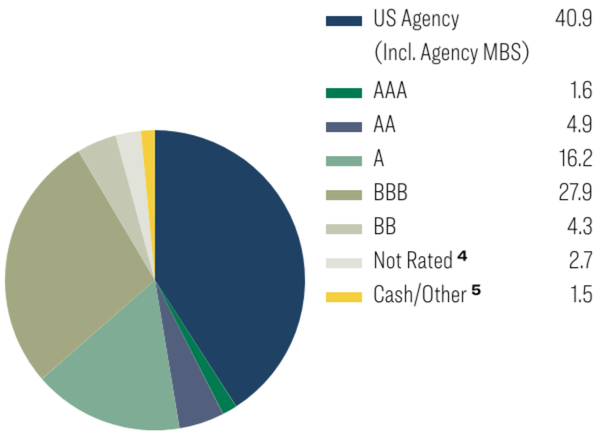
Composition

A: ETARX | C: ETCRX | I: ETIRX | N: ETNRX

Fixed Income Breakdown[1 2] (%) 06/30/2026



Debt Rating Allocation[1 3] (%) 06/30/2026



1. Allocation percentages are subject to change at any time, and should not be considered investment advice. Due to rounding, numbers may not add up to 100.
2. Source: Bloomberg Finance L.P.
3. Ratings (other than U.S. securities issued or backed by U.S. agencies) are a blend of a security's Moody's, S&P, Fitch, and DBRS Morningstar ratings calculated by Bloomberg. The rating agencies are evenly weighted when calculating the composite. It is calculated by taking the average of the existing ratings, rounded down to the lower rating in case the composite is between two ratings. A composite will not be generated if the bond is rated by only one of the four rating agencies. This composite is not intended to be a credit opinion. Credit quality does not remove market risk. Ratings apply to the credit worthiness of the issuers of the underlying securities and not the Fund or its shares. Ratings are subject to change.
4. Not Rated indicates that a bond has not been rated by a sufficient number of rating agencies to generate a composite rating using the methodology employed by Bloomberg.
5. Includes cash, cash equivalents, money market funds, impact bonds and options. Impact bonds fund business models that strive to have significant social or environmental effects.

1. The returns shown do not reflect the deduction of taxes that a shareholder would pay on fund distributions or on the redemption of fund shares. Because of ongoing market volatility, fund performance may be subject to substantial short-term changes.
2. SEC Yield is based on a 30-day (or one-month) period ending 06/30/2026 and is calculated by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period. The SEC yield is a standardized measure of a mutual fund's yield, showing the annualized income earned by the fund over the past 30 days after expenses. The subsidized SEC yield displayed reflects uses net expenses in the calculation while the unsubsidized SEC yield uses gross expenses. For more information see SEC Form N-1A. When applicable, subsidized includes waiver and unsubsidized is without waiver.
3. Represents the sum of all distributions from the period indicated. Distributions consist of dividend and interest income, capital gains, and/or return of capital. Shareholders should not assume that Fund distributions represent net profit. Income may be distributed regardless of whether such income will be treated as return of capital.
4. 12-Month Yield is the sum of a fund's total trailing 12-month interest and dividend payments divided by the last month's ending share price (NAV) plus any capital gains distributed over the same period.

Bloomberg U.S. Aggregate Bond Index [4]	5.55	5.96	1.00	1.00	-	-	100.00	100.00

1. The performance and risk factor comparisons are against the Bloomberg U.S. Aggregate Bond Index. Alpha is a measure of performance on a risk-adjusted basis. It takes the volatility (price risk) of a fund and compares its risk-adjusted performance to the Index. Any excess return of a fund relative to the return of the Index is a fund's alpha. Beta is a measure of the volatility of a fund relative to the Index. A beta greater than 1 is more volatile than the Index. R-Squared is a measure of how a fund's performance correlates with the Index's performance and it can help assess how likely it is that beta is statistically significant. Standard Deviation of return measures the amount of variation in historical performance from period to period.

Important Information

Mutual Funds involve risk including the possible loss of principal. Past performance does not guarantee future results.

The Fund's ethical values screening criteria could cause it to under-perform similar funds that do not have such screening criteria. Investors in the Fund should be aware that interest rates may change at any time based on government policy. In general, the price of a fixed income security falls when interest rates rise. Longer term securities may be more sensitive to changes in interest rates. A rise in interest rates may result in volatility and increased redemptions, which in turn could result in the Fund being forced to liquidate portfolio securities at disadvantageous prices. Interest rates are sensitive to changes in inflation, and investing in bonds exposes investors to inflation risk. Bonds may be subject to default, causing loss of invested capital. Fixed income investments may be of any maturity or credit quality, but the Fund's weighted average effective portfolio duration will be between three years and nine years. The Fund may invest, directly or indirectly, in "junk bonds." Such securities are speculative investments that carry greater risks than higher quality debt securities. The Fund can invest in smaller-sized companies which may experience higher failure rates than larger companies and normally have a lower trading volume than larger companies. There are unique risks associated with asset backed securities, convertible securities, credit, duration, extension, foreign securities, income, LIBOR, mortgage back securities, municipal bonds, preferred stocks, pre-payment, securities, sovereign debt, and U.S. Agency securities that are covered in the Fund's prospectus and SAI. The Fund has no history of operations prior to its inception date.

This information is for use with concurrent or prior delivery of a fund prospectus, which can be obtained at https://www.eventidefunds.com/prospectus or by calling 1-877-771-EVEN (3836).
