How did the Fund perform during the reporting period?

The Fund’s equity positions and fixed income positions outperformed its broad based benchmark. The Fund’s equity positions, which are focused on high-quality dividend growth companies, outperformed fixed income during this time period. The Fund’s fixed income positions outperformed its benchmark also due to the strength of corporate bonds versus Treasury’s from an allocation and selection perspective. Our focus remains on resilient growth, strong financials, idiosyncratic risk, and the overarching theme of human flourishing. Our experience underpins our confidence that these high-quality dividend growth companies, within this balanced equity and fixed income strategy, will continue to serve their customers, stakeholders, and shareholders effectively. How has the Fund performed over the last ten years?

The Fund’s past performance is not a good predictor of how the Fund will perform in the future. The graph and table do not reflect the deduction of taxes that a shareholder would pay on fund distributions or redemption of fund shares. The Fund’s performance information above is compared with a broad-based benchmark, Bloomberg US Aggregate Index, which represents the overall domestic bond market. In addition, the strategy benchmark, Bloomberg Mid Cap/Intermediate US Aggregate 50/50 TR Index, is included as the adviser believes it is more representative of the Fund’s investment universe.
